

## Alpentherme Gastein – Bad Hofgastein – Austria

Membrane type	Firestone GeoGard 1,5 mm
Surface	5,800 m <sup>2</sup> (installed in 6 days)
Installation date	May 2017
Depth	5 m
Storage	4.715 m <sup>3</sup> with both ponds

Alpentherme Gastein is a luxurious health and leisure spa in the alpine mountains that created 2 unique swimming lakes. The ponds are filled with warm and pure thermal water that is kept clean by a biological filtration system. The thermal water combined with the black liner gives the water a nice blue shimmer.

The bigger pond combines shallow areas for leisure and wide areas for swimmers and stand up paddlers. The smaller pond is made for sauna lovers that like jumping into pure water between 2 sessions.
